

# Ram Nikhil Teja Budide

Andhra Pradesh, India

ramnikhil312@gmail.com — +91 7095657446 — LinkedIn — GitHub

## Professional Summary

Software Engineer with **1.3+ years of experience** building scalable web applications using **Node.js, Express.js, React.js, and Next.js**. Proficient in **JavaScript and TypeScript** with experience developing responsive user interfaces and integrating **RESTful APIs**. Familiar with performance optimization techniques including **Server-Side Rendering (SSR)**, **lazy loading**, **caching**, and **bundle optimization**. Experienced in implementing **real-time communication using WebSockets**. Possess strong **computer science fundamentals and problem-solving mindset** with hands-on experience building production-ready full-stack applications.

## Technical Skills

**Languages:** JavaScript (ES6+), TypeScript, Java, HTML5, CSS3, SQL

**Frontend:** React.js, Next.js, Component-Based Architecture, Responsive UI Development, Dynamic Routing

**Backend:** Node.js, Express.js, RESTful API Development, API Design, WebSockets

**Databases:** MongoDB, PostgreSQL

**State Management:** TanStack Query (React Query), Context API, Asynchronous Data Handling

**UI Libraries:** Tailwind CSS, Shadcn UI, Material UI

**Tools:** Git, GitHub, GitLab, Vite, Webpack

**Computer Science Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, Time & Space Complexity

**Core Concepts:** Software Design Patterns, Debugging, Problem Solving, Performance Optimization

## Projects

### NyayaTech – Legal Case Management Platform

React.js • Next.js • TypeScript

- Developed a legal case management dashboard supporting multiple user roles with reusable and modular React components.
- Implemented **Server-Side Rendering (SSR)** and dynamic routing using Next.js improving initial page load speed and SEO.
- Integrated backend **REST APIs** and optimized asynchronous data fetching using efficient state management.
- Designed scalable component architecture improving maintainability and feature development.

### eSigns – Digital E-Signature Platform

React.js • IndexedDB • Tailwind

- Built secure document workflow interfaces allowing users to upload, annotate, and sign digital documents.
- Implemented **undo/redo functionality** using structured state management techniques.
- Utilized **IndexedDB** for efficient client-side document storage and offline capability.
- Designed responsive and accessible UI components ensuring cross-device compatibility.

### LandCare CRM – Community CRM Platform

Next.js • Node.js • MongoDB

- Developed CRM modules integrating **Next.js frontend with Node.js REST APIs** for community data management.
- Built interactive tools including a **drag-and-drop form builder** and Kanban workflow board for workflow management.
- Optimized frontend data fetching using **TanStack Query caching strategies** improving responsiveness.
- Implemented modular UI architecture enabling scalable feature expansion.

## Experience

### Software Development Engineer

Nov 2024 – Jan 2026

*Orotron*

- Developed and maintained scalable SaaS applications using **React.js, Next.js, and TypeScript** delivering responsive and high-performance user interfaces.
- Designed reusable and modular component systems improving development efficiency and maintainability across multiple modules.
- Integrated frontend applications with **Node.js/Express RESTful APIs** and implemented efficient asynchronous data fetching using **TanStack Query** with caching strategies.
- Implemented **Server-Side Rendering (SSR)** and dynamic routing using Next.js improving application performance and SEO.
- Improved application load performance by **30%** through lazy loading, memoization, and bundle optimization techniques.
- Implemented **real-time updates using WebSocket-based communication** enabling live data synchronization.
- Debugged complex UI and API issues using browser developer tools and performance profiling.
- Applied **software design patterns and modular architecture** to build scalable and maintainable features.
- Collaborated with backend engineers and product teams to design API contracts and deliver product features.

## Education

### Bachelor of Technology in Computer Science and Engineering

2020 – 2024

Rajiv Gandhi University of Knowledge Technologies

CGPA: 7.9 / 10
